The Great Pore Space Race: Where's the Finish Line?

Bill Whitelaw
geoLOGIC systems

Abstract

An overview of the critically important role pore space will play in rapidly accelerating energy transition times, with a particular focus on the criticality of public consultation in terms of the way various energy systems will compete for the pore space that has served its “Canadian owners” over the last century.

Biography

Bill Whitelaw is Managing Director of Strategy and Sustainability at geoLOGIC Systems, a Calgary-based global energy information firm with operations in London, Houston, India and Pakistan. He chairs the Canadian Society for Evolving Energy and is an advisor to the Energy Futures Lab and Clean Resource Innovation Network. He also heads the energy-agriculture strategic advisory panel at Agriculture for Life.
